

LEAP Delivery Plan 2021-22

The London Economic Action Partnership (LEAP) is one of 38 local enterprise partnerships in England. We are responsible for the whole Greater London area.

Chaired by the Mayor of London, LEAP works to deliver good growth for London, in support of a strong, prosperous and inclusive city. We invest in the capital's places, spaces, businesses and skills provision to ensure they deliver opportunities and benefits for everyone living in, working in or visiting London. We have committed over £300 million in growth funding to date.

Since the outbreak of the COVID-19 pandemic, we have pivoted our efforts to support London's businesses and skills providers to survive and, ultimately, recover. We have made significant changes to our programmes to accommodate this and we have worked closely with our delivery partners and the capital's small businesses to provide support throughout this immensely challenging time. Our aim is to recognise and celebrate the things that make London's businesses and communities unique, and to support them to survive, grow and thrive for many years to come.

The economic impact of the pandemic and the steps taken to tackle it will be far-reaching and long-lasting – and LEAP remains determined to do all it can to support London's economic recovery. We are committed to the Mayor's vision to reshape London as a city that remains open and attractive for Londoners, visitors and investors; and that addresses deep-seated inequalities to create new opportunities for people and businesses to thrive, while moving towards a low-carbon, sustainable future.

The Mayor and Cllr Georgia Gould, Chair of London Councils and Deputy Chair of LEAP, continue to lead London's recovery programme to focus on longer-term economic and social recovery. LEAP is very much involved in the programme and it is funding several initiatives related to the nine recovery missions. An overview of the recovery programme is available [here](#)¹ and the latest updates can be found [here](#)².

The context for the capital's recovery is extremely challenging. The crisis has exposed long-standing inequalities in our society. London's economy and its businesses have many challenges to overcome, and these are further compounded by the impacts of Brexit. But there is also an opportunity to reimagine our city as a place with a better long-term future for Londoners – one which is fairer, greener and more resilient than it was before.

Further details about LEAP's programmes and projects, including our initiatives to support London's economic recovery from COVID-19, can be found in the [LEAP Annual Report 2020-21](#)³.

This delivery plan outlines key performance measures for each of the main LEAP funded programmes with targets for 1 April 2021 to 31 March 2022. We will present quarterly updates on our progress to the LEAP Board and HM Government.
